

Arrangement in an unusual container

This can be a really fun subject, how unusual can you get?

Fruit, vegetables, footwear and household items have all been used to great effect. As long as the item can hold water [or a container that can hold water or oasis] it can be used.

Flowers and foliage must be fresh but can be wired. As in all arrangements the quality of your plant material is important. If in doubt cut some of your plant material prior to arranging to see how it keeps (remember the show can get warm and things wilt) then use fresh for the final piece.

Don't forget to have your container and any accessories in good order as well, finish matters. Go on be bizarre with your container and work out what plant material suits it.
